

# Section Breaking Rules

Case 1:

$$l < (r + t)$$

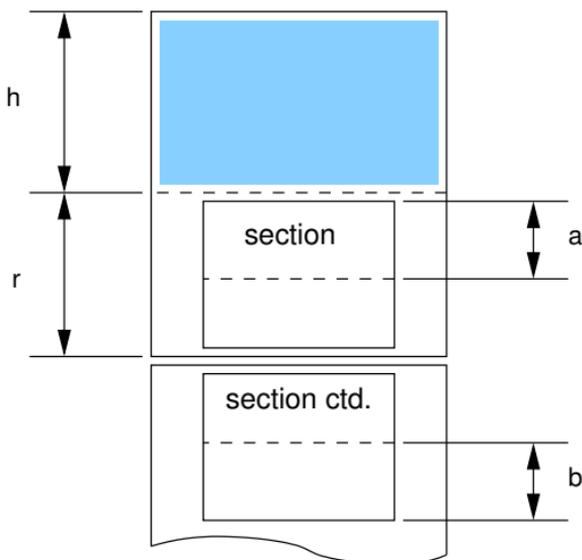

length of section is less than space left on page, no split required.

Case 2:

$$m > r$$

minimum length of section is larger than space on page, move whole section onto next page.

Case 3:

section is split so that at least  $a$  appears on the current page and at least  $b$  on the next page.

$$(a < m)$$
